

TRANSLATIONAL ENGINEERING: From Bench to Bedside

A deep dive into what it takes to bring biomedical research advances to patients. This seminar and project-based course will introduce you to the pre-clinical, regulatory, manufacturing, clinical trial, venture capital and legal needs for the successful translation of your biomedical developments. We will design a medical device and form a prototypic newco. Twenty-two seminars, four board meetings.

M/W: 2:30-4p, 3-370

Instructors: Prof. G. Traverso, cgt20@mit.edu

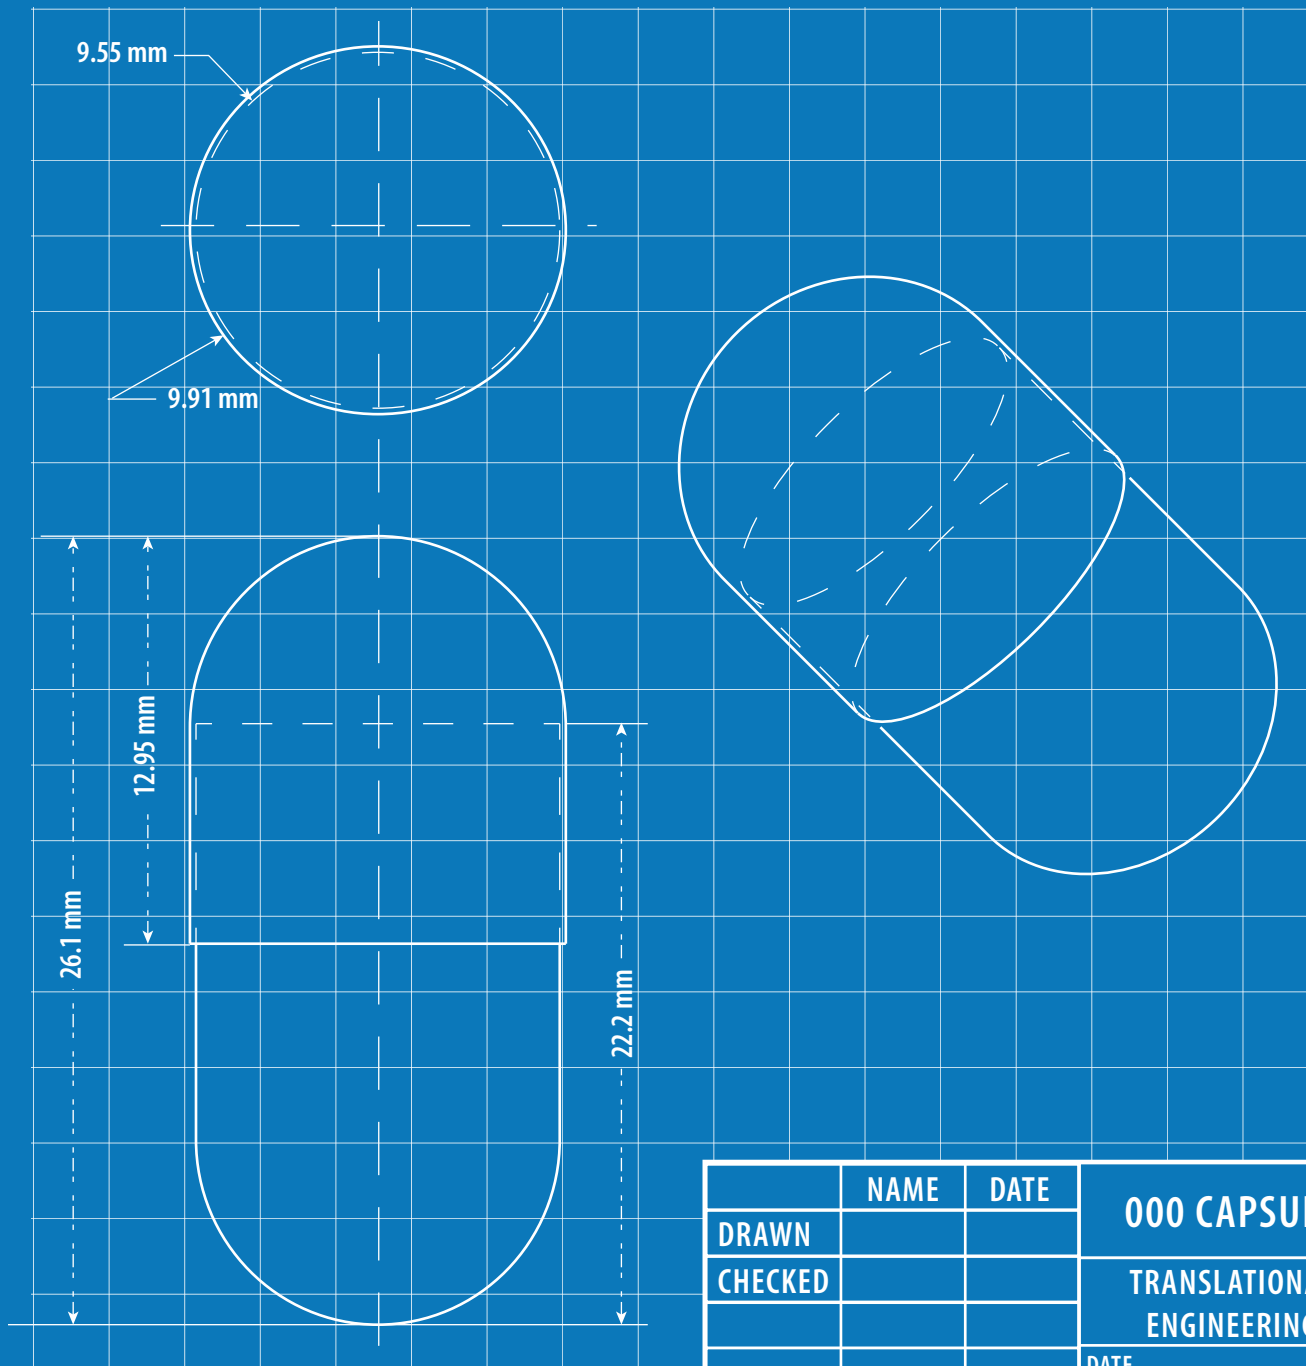

Mr. Jonathan B. Miller, jmill@mit.edu
